Commissioner for Patents

see attached papers.

Application/Control Number: 10/776,338

Art Unit: 2814

1. Applicant argues that the allowable independent claim 1 and the withdrawn independent claim 4 are generic to each other because they both disclose a vertical type junction filed effect transistor and a lateral type junction field effect transistor.

Page 2

As stated in MPEP 806.04(d), "... In general, a generic claim should require no material element additional to those required by the species claims, and each of the species claims must require **all the limitations** of the generic claim ..." [emphasis added]. In this case, the withdrawn independent claim 4 is not a generic claim because the allowable independent claim 1 clearly does **not** include **all** the limitations of the withdrawn independent claim 4. Specifically, the independent claim 1 is directed to a semiconductor device having "a **gate** of the second field effect transistor connects to the **gate** of the first field effect transistor", and the independent claim 4 is directed to a semiconductor device having "the **source** of the second field effect transistor connects to the **gate** of the first field effect transistor". Therefore, the allowable independent claim 1 and the withdrawn independent claim 4 are <u>not</u> generic as asserted by Applicant. They are distinct species (also see restriction/election requirement mailed on 7/21/05) and they are mutually exclusive (see MPEP 806.04(f)).

2. This application is in condition for allowance except for the presence of claims 4, 6 and 7 directed to an invention non-elected with traverse in the reply filed on 8/9/05.

Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144).

Failure to take action during this period will be treated as authorization to cancel the

noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is 571-272-1703. The examiner can normally be reached on M-F.
